

Construction & Engineering Services

COST ESTIMATING & FORENSIC COST ANALYSIS

CPG offers experienced estimating and change order management services for Owners and General Contractors in the civil construction industry. From design drawing and specification analysis, quantity take-offs and production analysis, CPG can produce quality estimates from project concept to completion, and all phases between. The CPG team is proficient with the latest bid software programs and delivers thorough and detailed cost breakdowns. Additionally, CPG is capable of immersing in on-going project level cost and change order management. CPG provides cost services that can help our clients understand ever present changes in their projects to provide benefit from both a cost and schedule perspective.
