

THE UPDATE

Capo Projects Group
July 2020

Moving Forward

As COVID-19 continues to shape the world we live in, we are adapting to what this new world looks like. From the beginning, our team has been dedicated to staying ahead of the curve when it comes to the technology solutions we provide, and the methods of service delivery we practice.

CPM | Axis and Remote Work

The switch to a fully remote team during the pandemic was seamless thanks to CPM|Axis. We created CPM|Axis with the hope that it would improve our services, support our industry, and support other companies in our industry as well. Throughout the pandemic we have been able to keep schedules up to date, despite not working with our teams in person. Our efforts to incorporate technology on the front end are paying off, especially as situations remain uncertain.

Business as “the new” Usual

The world is changing quickly and we're ready to meet that challenge. During the early days of the pandemic, we moved our team fully remote. As businesses slowly reopen, our staff are preparing to move back on site according to established safety regulations (if they aren't already back on site). We plan to practice social distancing and the use of face masks at every client meeting until COVID-19 decreases in prevalence. Our industry is essential and we're doing everything we can to make sure that we can continue to provide our clients with the services they need to keep going during these unpredictable times.

Recent Events

We attended some great events this year before quarantine, and we're glad we had the opportunity to join in. We attended the Annual Golden Beavers Awards hosted by the Beavers, as well as the 2020 Western Winter Workshop. We look forward to the day when these events will be hosted again.

COVID-19 Meets Time Impact Analyses

As COVID-19 caused shutdowns to varying degrees across the country, projects were inevitably delayed. That leaves room for a lot of uncertainty, especially when it comes to Time Impact Analysis and Delay Claims. This is an unprecedented situation that most of us could not have anticipated. Our team is here for our clients through these novel circumstances providing you with our best resources for managing these changes to your schedules.

Tom Huntington has been participating in a number of panels with CMAA on the topic providing his knowledge and expertise to the CM community.

Staying Connected

As soon as Stay at Home orders went into place we knew we needed to do something to keep morale up and provide a space for our team to communicate from our remote locations. We set up weekly virtual happy hours which definitely get us through the early days of the pandemic. As we continue to work remote and in less populated office spaces, we are looking forward to continuing this tradition.

Company Updates

Recent Wins

We are also continuing to grow in our practice areas and we're excited to expand into new industries. We're building new relationships and are excited to announce our upcoming work with the City of Thousand Oaks, Wake County School District in North Carolina, and California High Speed Rail Package 5. We are also excited to be moving forward with Program Controls for the City of Ontario

New Team Members!

Since our last update we have welcomed Melissa Kamp, Ashley Walton and Scott Morse to our team. Ashley and Scott have joined our team of schedulers and Melissa is our Accounting Assistant and Recruiting Manager.
